American Institute of Architects Member

Construction Specifications Institute Member and Past President, Illinois Chapter

Alan brings 25 years of project experience to his oversight of Eckenhoff Saunders' Quality Assurance and Quality Control (QA/QC) program, which conducts and arranges detailed reviews of every project at development milestones and again before bidding. As head of specifications, he proactively helps project teams address design and technical challenges.

Before his QA/QC role, Alan managed the municipal approval process for the multi-phased, \$70 million implementation of Glenbrook Hospital's master plan. This project's components included a new 174,000 sf Ambulatory Care Center, expansions of radiology, emergency, central plant, parking lots, and extensive site work. Alan also worked on a 30,000 sf vertical expansion of UChicago Medicine Ingalls - Flossmoor Family Care Center.
