

GRUBHUB

CONCEPTUALIZATIONS FOR EXPANSION AND RENOVATION OF NATIONAL HEADQUARTERS

CLIENT Grubhub | **LOCATION** Chicago, Illinois (Loop) | **SIZE** 130,000 sf

PROJECT SCOPE

Let's take a moment to remember those cherished summers at camp. School was finally out, and the refreshing lake breeze and the scent of cedar would wash away any lingering memories of desks, homework, and exams. At camp, we found joy in both work and play, bonded with our peers, and felt a strong sense of community and independence.

Imagine a workspace that captures the vibrant spirit and energy of summer camp. The proposed Grubhub office renovation is not just a renovation, it's a transformation. It's a work environment that empowers employees to unleash their potential, while also providing ample opportunities for collaboration and rejuvenation. The design is not just about aesthetics, it's about creating a space that reflects Grubhub's strong brand identity, fosters collaboration and recreation, and offers a serene roof deck oasis for relaxation.
