

EVANSTON HOSPITAL - LDR & POSTPARTUM

POSTPARTUM, LDR, AND SUPPORT SPACE RENOVATIONS

CLIENT Endeavor Health | **LOCATION** Evanston, Illinois | **SIZE** 15,400 sf total (LDR); 9,900 sf (postpartum)

PROJECT SCOPE

Postpartum: Eckenhoff Saunders partnered with Evanston Hospital to renovate the postpartum rooms on the 2nd floor of the existing hospital. The renovation involved 15 rooms on the 2nd floor (9,900 sf). The new postpartum rooms are intended to supplement the current ground-floor LDR departments, which were taken out of rotation during construction. To ensure uninterrupted care, the temporary LDR rooms were flexibly used for overflow LDR, midwives, and postpartum rooms, thereby maintaining a seamless transition and continuity of care during the construction phase.

LDR: Eckenhoff Saunders has significantly expanded the hospital's capacity by gutting ten existing LDR rooms to create fourteen new LDR rooms. This expansion, part of the ground floor renovation, also included the relocation of the staff locker rooms and lounge to the existing gift shop location, resulting in the creation of four additional LDR rooms. The ground floor renovation also encompassed core support spaces, including a concierge, staff locker room and lounge, security desk, and surgery support.
