

GLENBROOK HOSPITAL CAMPUS

MASTER PLAN

CLIENT Endeavor Health (NorthShore University HealthSystem) | **LOCATION** Glenview, Illinois | **SIZE** 240,000 sf

PROJECT SCOPE

Eckenhoff Saunders has masterplanned and executed every significant improvement and expansion to the 100 bed Glenbrook Hospital campus since the early 1990s. These include approximately 240,000 sf of outpatient facilities, new inpatient departments for imaging, cancer, emergency, neurological, surgery, recovery, central sterile, and GI. The firm converted the inpatient rooms to private rooms, including a new 5th floor with 48 rooms.

Eckenhoff Saunders augmented circulation patterns throughout the campus and hospital with retail outlets for pharmacy, café, gifts, and exterior gardens. Campus-wide circulation patterns are streamlined, and parking for 1,200 cars has been added, enhanced by indigenous landscaping.
