

HIGHLAND PARK HOSPITAL - PATIENT FLOOR RENOVATIONS

3RD AND 4TH FLOOR PATIENT RENOVATIONS

CLIENT Endeavor Health | **LOCATION** Highland Park, Illinois | **SIZE** 32,000 sf (56 patient rooms)

PROJECT SCOPE

Eckenhoff Saunders recently completed a comprehensive renovation of two inpatient units at Highland Park Hospital, enhancing private patient rooms, nurse stations, and staff support and visitor areas. The project included the replacement of windows, finishes, lighting, and fixtures, as well as the relocation of the concierge desk and upgrades to the visitor lounges. A thoughtfully curated finish palette, featuring accent wall colors, not only aids in orientation within the triangular-shaped layout but also effectively defines staff areas, enhancing both functionality and patient experience.
