Chicago Women in Architecture

As an Architectural Specification Writer and Director of Technical Coordination, Samantha leads the firm's QA/QC efforts, ensuring projects meet the highest standards of technical excellence and constructability. With deep expertise in building systems, codes, and specifications, she supports risk management, document consistency, and technical mentorship. Samantha also plays an important role in our healthcare design market, providing key oversight from concept through delivery, reinforcing the firm's reputation for reliable, high-performance architecture.
