

## BEHAVIORAL HEALTH CENTER - PALATINE

TRANSFORMATION OF EXISTING SPACE TO EXPAND ACCESS TO BEHAVIORAL HEALTHCARE

**CLIENT** Endeavor Health | **LOCATION** Palatine, Illinois | **SIZE** 17,000 sf

### PROJECT SCOPE

Eckenhoff Saunders partnered with Endeavor Health to transform an existing two-story medical office building into a comprehensive outpatient behavioral health center, expanding access to mental health services throughout Chicago's northwest suburbs.

The adaptive reuse project consolidates behavioral health programs into a single, patient-centered facility offering counseling and therapy, psychiatric medication management, Partial Hospitalization Programs (PHP), Intensive Outpatient Programs (IOP), specialized Anxiety & OCD treatment, and Transcranial Magnetic Stimulation (TMS) therapy. The center serves adolescents, adults, and older adults in a welcoming environment that promotes healing, dignity, and well-being.

Designed to balance patient privacy, safety, and comfort with operational efficiency, the facility features intuitive wayfinding and flexible clinical spaces that support a variety of treatment programs while accommodating future growth. By repurposing an existing building, the project expands behavioral healthcare capacity and reinforces Endeavor Health's commitment to accessible, community-based mental health services.
